Listes des produits phytopharmaceutiques

Date de mise à jour : 16/09/2026

À titre informatif, cette liste reprend les produits phytopharmaceutiques contenant au moins une subtance PFAS telle que définie sur Phytoweb. Plus d'informations sur https://fytoweb.be/fr/produits-phytopharmaceutiques/usage/utilisateur-professionnel/pfas.

Avant tout achat ou utilisation de produits phytopharmaceutiques, il est essentiel de consulter www.phytoweb.be. Ce site web est la source de référence des PPP en Belgique, il fournit les dernières mises à jour ainsi que l'ensemble des conditions d'application. La liste des produits autorisés y est régulièrement actualisée en fonction des modifications, retraits ou nouvelles mises sur le marché décidés par les autorités belges. Il est donc indispensable de s'y référer et de lire attentivement l'étiquette des produits avant toute utilisation.

Le CRP ne peut en aucun cas être tenu pour responsable en cas de dégâts, directs ou indirects, pouvant survenir suite à l'application des données fournies dans ces listes, à une attitude inadéquate ou à une négligence.
